

Precision Energy and Technology has been working with fuel cell technology since 2005 and specializes in producing educational fuel cell kits.

10 cm² Hydrogen Generator

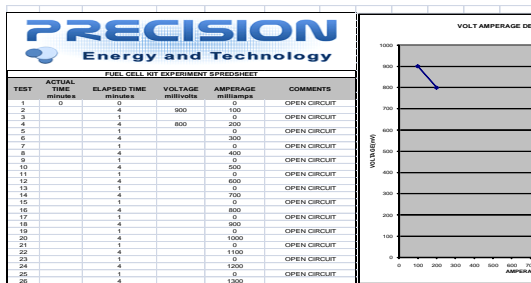

\$525

FEATURES

- Strong, heavy duty housing
- 10 cm² Area Electrodes
- Durable 316L bipolar plates
- High quality MEA – Nafion 117 with double layered Platinum-alloy Electrodes
- Barb fittings for easy gas connections
- Banana plug electrical connections
- Strong PVC construction
- Sealed pressure relief
- Approximately 30 ml of hydrogen per minute

PET's 10 cm² Hydrogen Generator is based on the 10 cm² Fuel Cell and was the result of investigating the needs of the instructors for easy and safe hydrogen dispensing for fuel cell instruction. The 10 cm² Hydrogen Generator is constructed of black and clear PVC piping and incorporates a sealed plunger to avoid overpressure conditions. The unit is capable of generating 30 milliliters of hydrogen per minute in support of the fuel cells.
